

KITCHEN & BARSTOOLS

A Collection shaped by
refinement of line and contour,
positive and negative space.

OKHA STUDIO

INDEX

- 3. VOID
- 4. VOID 2
- 5. LOLA
- 6. FRANK
- 7. FRANK II
- 8. CARLOTTA

VOID

At the heart of the VOID series of kitchen and barstools is the use of negative space as a powerful visual form, equal in impact to the physical form. Together the positive and the negative unify to produce a design that is boldly defined, graphic and pure.

VOID 2

Drama, elegance and comfort. With the VOID 2, the single vertebrae is replaced by two verticals that continue past the seat to support an arched backrest. At the base of the verticals, the heel is dramatically cut into and is reminiscent of the heel, ankle and instep of a tall heeled shoe; it also takes our eye to a brass rod connecting the two verticals.

LOLA

The left and right curved husks of LOLA wrap and hold the seat and act as pillars of support. The design is a construction of open spaces, grounded forms and fine lines, working with complimentary materials; leather, wood and brass, and also available in other metals and veneers.

FRANK

The FRANK series of seating has become an iconic OKHA design. Available in a variety of metals and finishes, the FRANK series is immediately recognisable by its lean and elegant, minimalist outline and form. The design works with differing weights of construction and a precise less is everything philosophy.

FRANKII

FRANKII takes a minimalist ethos and further reduces the form to core essentials without sacrificing the poetry of the design.

CARLOTTA

The bold, striking works of Jean Prouve have inspired several OKHA designs, CARLOTTA is one of them. The signature triangulated, tapering legs that appear to be pressing forwards are the signature of the VERB dining chair and the CARLOTTA barstool.

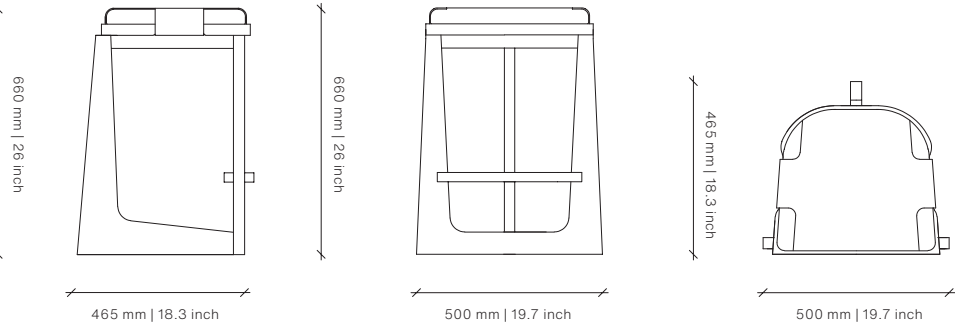

VOID Counter Stool

DESIGN BY OKHA

Image shows Carbon Ash and Black Leather

Frame

Dimensions (mm)
500W x 465D x 660H
Seat Height: 660

Dimensions (inches)
19.7W x 18.3D x 26H
Seat Height: 26

COL 1.6 m² | 17.2 sq ft

Different textures, grains, colouration and densities are all natural characteristics of timbers. We find these variances an inherent and valuable part of the natural beauty of wood, no two pieces are the same making each OKHA design a unique, characterful piece and each product will be different from the next. Timber movement will also occur as this is a natural product.

STONE: Marble is a beautiful natural material with inherent imperfections in its structure, veining and coloration. As such, some slabs may be reinforced with meshing on the underside and may have colour matched resin fills in minor cracks and surface blemishes. Please note that this is standard practice.

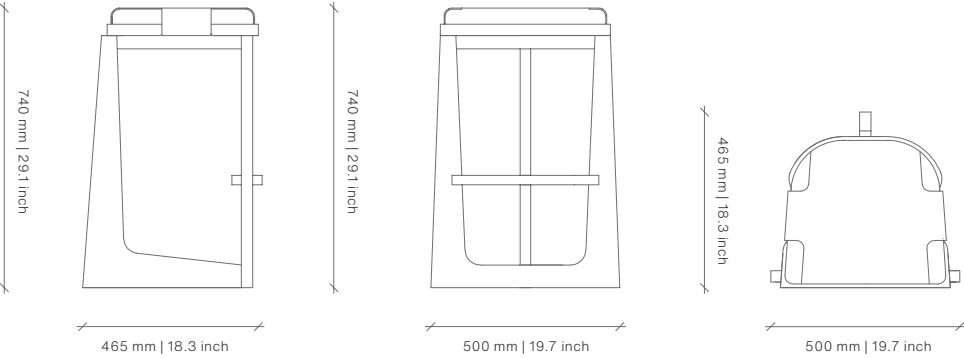

METAL: All metals will go through a process of natural aging and oxidization due to environmental conditions. The result of this aging process will bring about colour change, to slow and reduce this natural process, appropriate cleaning and maintenance products can be used.
