VERB 2

The Verb 2 chair cuts a defined silhouette, its form of finely crafted bold angles and horizontals result in a precise grace. Paying homage to the considered angularity of Jean Prouve, the resulting form emphasizes comfort with unfailing style.

TORO

Continuing the OKHA signature of a clearly defined outline and elegance of form, the Toro chairs are gracefully poised. Fine timber craftsmanship with sumptuous seating provides refined seating. Available in a range of finishes and in Straight Leg and A Frame variants.

VOID

Using negative space as a design element, the VOID seating collection expresses a taught, sculptural silhouette. The design is reductionist, emphasizing precise lines, positive and negative form.

AUGUSTE

A design whose emphasis is sumptuous seating and a form that is striking from all angles. There is an intentionally exaggerated weight and substance to the chairs front and rear legs, both with brass detailing. AUGUSTE has stature and permanence.

MORAMOUR

The versions of MORAMOUR convey a quiet grace. The rear leg a vertical trapezoid, which create an angled back rest, the design is rigorous yet provides great ergonomics and comfort.

BARNETT

Combining a sensually balanced frame and wrap around cradled seat that holds the sitter, the BARNETT chair is a modern classic. Well proportioned, elegantly crafted, it is a union of great comfort and timeless style.

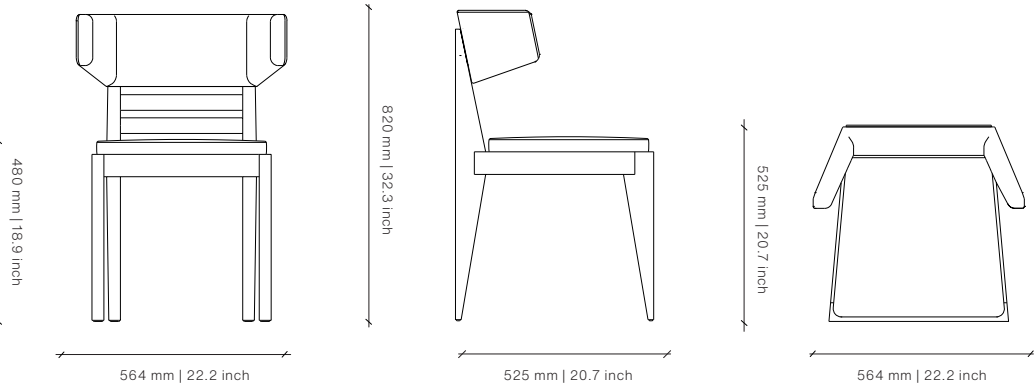

VERB 2 Dining Chair

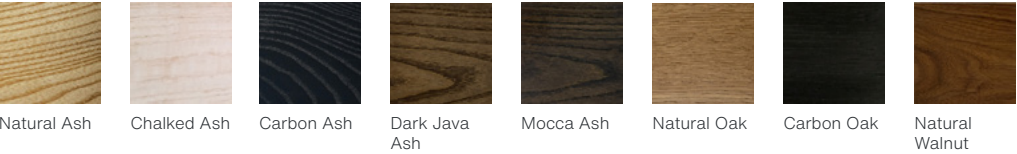

DESIGN BY OKHA

Image shows Carbon Ash and Anthracite Leather

Frame

Dimensions (mm)
564W x 525D x 820H
Seat Height: 480

Dimensions (inches)
22.2W x 20.7D x 32.3H
Seat Height: 18.9

COM: 1.4 m | 1.5 yd
COL: 2.6 m² | 28 sq ft

Different textures, grains, colouration and densities are all natural characteristics of timbers. We find these variances an inherent and valuable part of the natural beauty of wood, no two pieces are the same making each OKHA design a unique, characterful piece and each product will be different from the next. Timber movement will also occur as this is a natural product.

STONE: Marble is a beautiful natural material with inherent imperfections in its structure, veining and coloration. As such, some slabs may be reinforced with meshing on the underside and may have colour matched resin fills in minor cracks and surface blemishes. Please note that this is standard practice.

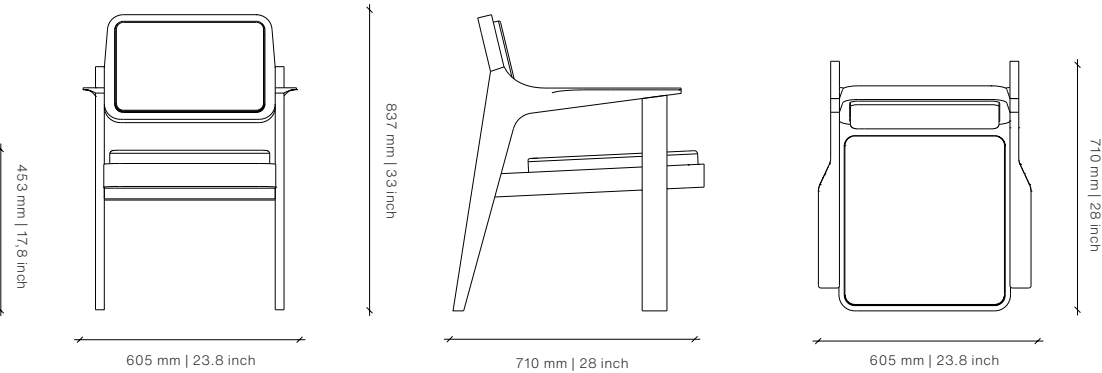

METAL: All metals will go through a process of natural aging and oxidization due to environmental conditions. The result of this aging process will bring about colour change, to slow and reduce this natural process, appropriate cleaning and maintenance products can be used.
