

SOFAS

At the heart of the OKHA sofa collection is form. Form takes on the impression of a human landscape for elegant lounging, relaxing, reposing. The forms can be sensual and fluid or geometric and linear, the foundation is always easy, sophisticated comfort, through shaping, proportion and calibration.

OKHA STUDIO

INDEX

- 3. REPOSE
- 6. REVERB
- 8. ZONA LANDSCAPE
- 10. ZONA MODULAR
- 12. ZEPPELIN MODULAR

REPOSE

Repose has become a defining piece in contemporary seating. Softly sculpted, its presence shapes the room; Its form stretches and lengthens, like a body in recline.

REPOSE

Defined by its cut and carved form, Repose engages from every angle, inviting the sitter in. It adapts to minimalist, contemporary and classic settings. Available in multiple size and format configurations and base finishes.

REPOSE

REVERB

Continuing the sensual landscape of the Repose collection, Reverb resembles softly contoured rock formations shaped by time.. The sofa is a sculpted form; easy and inviting, pleurably languorous.

REVERB

Easy, sophisticated lounging.

ZONA LANDSCAPE

The Zona Collection is built on the principles of junctions and transitions, forms that come together, that engage and hold one another, that dock to create a unified structure. Continuing a language of soft, sculpted landscapes, three elements; the back, seat and arm connect in a symbiotic manner to create Zona.

ZONA LANDSCAPE

The Landscape variant is also modular and customisable. The base available in a range of timber finishes as well as upholstered.

ZONA MODULAR

Zona is a sofa that breaks the rule of the standardized linear and geometric format associated with modular seating. The design brings a more sensual and curvaceous expression to modular seating.,

ZONA MODULAR

Zona's gentle curves are soothing and sensitive. Zona brings a sense of romance to the modular landscape.

ZEPPELIN MODULAR

With its rigorous composition of bold, geometric forms, Zeppelin brings a rigorous vernacular to OKHA's modular seating collection. Focusing on balance of scale and proportion, Zeppelin's grounded stance provides great comfort and the flexibility of multiple configurations.

ZEPPELIN MODULAR

Taught, clean lines, comfort, easy flexibility and functionality, the design of Zeppelin allows great scope for interpretation and customisation.

Dimensions (mm)
3 690W x 1 685D x 690H
Seat Height: 370

Dimensions (inches)
145.3W x 66.3D x 27.2H
Seat Height: 14.6

COM 15 m | 16.4 yd

Different textures, grains, colouration and densities are all natural characteristics of timbers. We find these variances an inherent and valuable part of the natural beauty of wood, no two pieces are the same making each OKHA design a unique, characterful piece and each product will be different from the next. Timber movement will also occur as this is a natural product.
STONE: Marble is a beautiful natural material with inherent imperfections in its structure, veining and coloration. As such, some slabs may be reinforced with meshing on the underside and may have colour matched resin fills in minor cracks and surface blemishes. Please note that this is standard practice.
METAL: All metals will go through a process of natural aging and oxidization due to environmental conditions. The result of this aging process will bring about colour change, to slow and reduce this natural process, appropriate cleaning and maintenance products can be used.

51.2W x 42.5D x 26H
Seat Height: 14.6

COM 6 m | 6.6 yd
COL 10.8 m² | 116.3 sq ft

Different textures, grains, colouration and densities are all natural characteristics of timbers. We find these variances an inherent and valuable part of the natural beauty of wood, no two pieces are the same making each OKHA design a unique, characterful piece and each product will be different from the next. Timber movement will also occur as this is a natural product.

STONE: Marble is a beautiful natural material with inherent imperfections in its structure, veining and coloration. As such, some slabs may be reinforced with meshing on the underside and may have colour matched resin fills in minor cracks and surface blemishes. Please note that this is standard practice.

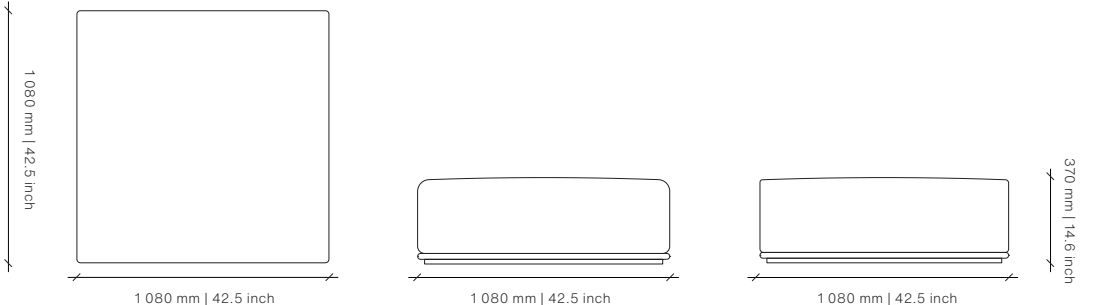

METAL: All metals will go through a process of natural aging and oxidization due to environmental conditions. The result of this aging process will bring about colour change, to slow and reduce this natural process, appropriate cleaning and maintenance products can be used.

ZEPPELIN MODULE E Sofa
