

Stellar & Super Stellar

OKHA

Stellar &
Super Stellar

OKHA

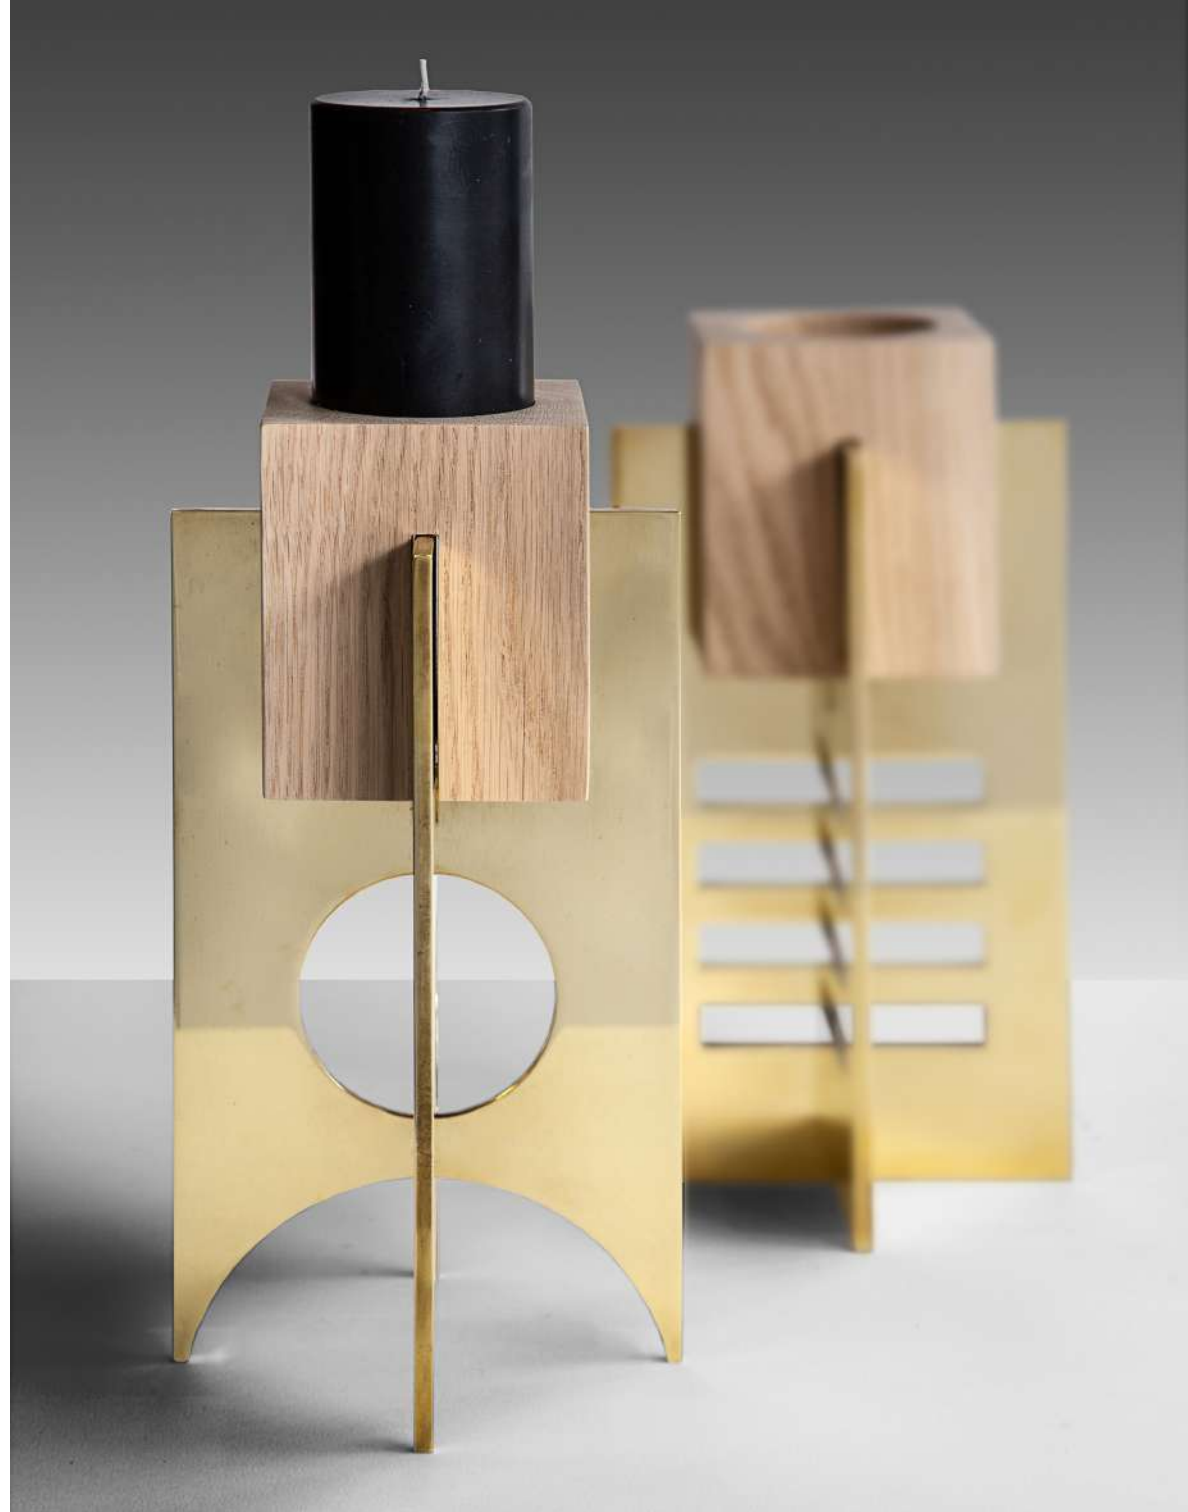

“These forms
are Simplex objects,
simultaneously simple
and complex
and represent
the principal that
 $1+1=3$.”

OKHA

Stars are the result of a heated compression of interrelational forces: the force of gravity compresses atoms in interstellar gas until a fusion reaction begins and a new form is born. The same description can be applied to many elements, including human nature.

OKHA

The Stellar and Super Stellar candleholders are imbued with, “the emotional evocation of starlight, movement, combustion and constellation.”

The colour works are made of mild steel, however the blue and green Stellar pieces have undergone a rigorous process of oxidization and patination to attain their depth of colour, whilst the golden SUPER STELLAR are of solid polished brass.

Bringing opposing elements and forces together brings about new life, a new entity, form or perspective.
